SYSTEMS™

## Why Detoxify?

We are all exposed to various sources of pollutants, chemicals, and toxins on a daily basis. These toxins enter the body in three ways: through the skin, the digestive system, and the lungs. They interfere with the body's ability to work properly. Trauma, stress and modern day diets all disturb the body's natural ability to excrete these toxins.

Toxins accumulate when they exceed the body's ability for elimination. Build-up of toxins causes one to become more stressed and reduces proper body functioning. As body systems fail, it becomes more difficult to fight off disease and infection, and energy levels decline. Platinum Energy Systems™ Detox Foot Spa is one of the easiest and most pleasant ways for someone to detoxify, restore energy levels, and return to a natural state of health and well-being.

## What are the benefits of detoxification treatments?

Everyone can benefit from detoxification treatments.

Platinum Energy Systems™ Detox Foot Spa clients have experienced:

- ❖ Improved health including circulation, acid/alkaline balance
- ❖ Increased metabolism, organ and glandular functioning
- ❖ Enhanced physical, emotional, and mental well-being
- ❖ Improvement in pollutant-related illness
- ❖ Maintenance and balance of overall health
- ❖ Removal of heavy metals from the body (e.g.: lead and mercury)
- ❖ Stress-reduction
- ❖ Restoration of normal sleep patterns
- ❖ Reduction of pain, injury, and trauma
- ❖ Reduction of acidity levels to benefit organ and cellular functioning

## How does it work?

Toxins exit the body naturally through the sweat glands. Feet contain more sweat glands than anywhere else in the body.

When clients begin a Platinum Energy Systems™ treatment, they place their feet in the Foot Spa with warm salt water. Toxins are eliminated as the specially designed system stimulates the sweat glands of the feet to expel their contents into the water. Saunas and steam rooms detox in a similar manner by eliminating toxins through the sweat glands.

The Detox Foot Spa combines the principle of optimizing toxin elimination with the healing properties of hydrotherapy and reflexology.
